

## ISCC PLUS Certification Obtained

Kadotoku Corporation is pleased to announce that it has received ISCC PLUS certification as of November 22, 2022.

“The management of Kadotoku Corporation is pleased to make the following declaration to our stakeholders.

Kadotoku Corporation is committed to and declares its compliance with the ISCC PLUS requirements in accordance with the latest ISCC regulations.”

The ISCC (International Sustainability & Carbon Certification) is a sustainability certification program for biomass and recycled raw materials that is gaining popularity in Europe. The ISCC has been gaining prominence in Japan in recent years. We were one of the first companies to join this project.

With the acquisition of ISCC certification, we will fully utilize the value of ISCC certification, expand the number of ISCC-certified suppliers, and increase the supply of ISCC-certified products to buyers, thereby contributing to the realization of a sustainable society.

We are pleased to introduce Perstorp's product range on our website as a solution for our customers. Please take a look at it as well.
